Experience

Development Leader   **April 2024 – Present**
Agile Solutions
Contractor for Epicor, overseeing an internal Angular based framework used across all company projects to maintain a consistent visual aesthetic.

- Optimized grid performance, reducing loading times by 60% for datasets exceeding 1,000 rows.
- Improved REST calls operations to AZURE by storing data on cache, cutting API calls in 1/3 and saving over $1,000/day
- Designed and developed AI-powered features for the framework, integrating GPT-4 for intelligent automation.

Full Stack Freelance Engineeer   **March 2022 – April 2024**
Hotay
Collaborated directly with the CEO to build and maintain customer websites and web applications.

- Redesigned business websites, improving UI, UX, and SEO, resulting in a 27% increase in user traffic.
- Developed a sales dashboard tracking individual performance, company goals, spending trends, and historical comparisons, improving data visualization.

Frontend Freelance Engineeer   **January 2021 – February 2023**
Contra / UpWork
Worked on dozens of projects via Contra and UpWork, specializing in web design and frontend development.

- Designed and built the chatbot UI for Instro.ai, optimizing token usage and implementing streaming text functionality for improved efficiency.
- Developed high-converting landing pages for multiple businesses, leading to a 30% increase in customer acquisition.

Education

Bachelor of Information Technology Management, Estácio de Sá | March 2020 – January 2024

- Equipped with a robust foundation of knowledge, this program has prepared me to excel in diverse technology sectors.
